MAINTENANCE CONTRACTS AND SITE SERVICES

A F Switchgear

TAILORED MAINTENANCE CONTRACTS

Switchgear failure resulting in a partial or total loss of your electrical network has far reaching consequences. Production lines, data networks and other equipment are disrupted, affecting productivity and health and safety compliance in addition to financial loss and consequential repair costs.

AF Switchgear offer structured maintenance contracts tailored to each customer's requirements for all our equipment and for systems provided by third-party suppliers.

Maintenance Options Available

- 24/7/365 Emergency support
- Preventive maintenance visits
- Technical telephone support
- Live, non-invasive maintenance
- Thermal imaging surveys
- Tailored spares packages

Contact us to arrange a maintenance contract tailored to suit your operational needs, and ensure uninterrupted operation of your distribution switchgear.

SITE SERVICES

The following services, incorporated in our maintenance packages, are available individually to satisfy immediate requirements.

- Routine maintenance
- Thermal imaging surveys
- Injection testing
- Power monitoring surveys
- Inspection and cleaning
- Control system operation checks

Why regular maintenance is important

In normal switchgear operation, the mechanical devices deteriorate without regular operation and maintenance. This can lead to failure when they are required to operate under emergency conditions.

Effective maintenance is essential for trouble-free continuous operation and to maintain design capability under emergency conditions.

ADDITIONAL INFORMATION

Preventive Maintenance

A programme can be arranged in joint consultation with the customer and this can include:

- Inspection, lubrication and cleaning
- Report on potential problems and their resolution
- Routine maintenance in accordance with manufacturer's recommendations.

Emergency Service

A trained team can be assigned to resolve the problems with the minimum delay. You determine the response and cover times appropriate to your operating conditions, when you arrange the contract.

Spares

If required, spares packages can be held on site or bonded in our warehouse, to cover major component replacement without supply difficulties.

Routine Maintenance

This can be carried out at mutually agreed times, to avoid disruption of your company operation.

To arrange your maintenance contract, please contact:
